Need Assessment

The need of the hour today is to provide Solution incorporating latest technological advances that shall help your esteemed Organization in effective management of their Cloud Based Centralized ERP Software Integrated with HMS - ERP Solutions. The solution should help in adding value to existing processes and resulting in efficient management.

We have been providing user friendly customized software solutions. Our Business analysts will carefully study your requirements as well as existing work flow to prepare functional requirement specification with structured design and try to distribute work load department wise or person wise and all the specific work done by individual user will be integrated with a list for final verification, select the list of inserted record and a mouse click they can finish their work.

Company Profile– TECHSR ENTERPRISE

Company Overview

Techsr Enterprise is a forward-thinking software development company committed to delivering cutting-edge technology solutions that drive innovation and enhance business performance. With a team of dedicated professionals, we specialize in providing custom software development, enterprise solutions, and IT consultancy services tailored to meet the unique needs of our clients. . Over the years, we have evolved into a dynamic team of industry experts, software engineers, and customer-centric professionals dedicated to delivering cutting-edge ERP solutions. At TECHSR, we are more than just a software company. We are architects of digital transformation, empowering enterprises to thrive in an ever-evolving business landscape. With a passion for innovation and a commitment to excellence, we have positioned ourselves as leaders in the realm of Enterprise Resource Planning (ERP) solutions.

Our Goal

At TechSR, our goal is simple yet profound: to bridge the gap between technological advancements and business success. We understand the challenges that modern enterprises face in managing complex operations, and our mission is to provide them with intelligent ERP solutions that not only address their immediate needs but also pave the way for sustained growth and innovation.

Our Mission

Our mission is to empower businesses by seamlessly integrating technology into their core processes. We strive to deliver ERP solutions that go beyond conventional software, fostering innovation, and providing the agility needed to adapt to a dynamic marketplace. We are committed to being a trusted partner on our clients' journey towards digital excellence.

Specialization

Our specialists have been providing software development services for multiple clients, starting from small companies and continuing with very big clients in the domains Enterprise Resource & Planning (ERP), Hospital, Education, Micro Finance Industries, Co-op Banks, Manufacturing, Human Resource, Finance etc. We have completed different kinds of projects, and we specialize in automation of business processes used by our clients

Business Objective

- ◆ Provide solutions services and products to meet business goals and challenges.
- ◆ Ensure highest levels of accuracy, efficiency and appearance of customer components.
- ◆ Propose responsive proposals for proper cost-effective solutions.
- ◆ Ensure projects are completed and delivered within schedule.
- ◆ Deploy the right mix of people and products to deliver value-added services and solutions.
- ◆ Maintaining the right quality of services and solutions

Technologies

MS Visual Studio, MVC Architecture with Angular JS, Java Script Ajax.

Database Design & Implementation

Oracle, Microsoft SQL Server 2016

- Programming Languages: Python, Java, C#, JavaScript, PHP.
- Frameworks: React, Angular, .NET, Django, Spring.
- Cloud Platforms: AWS, Microsoft Azure, Google Cloud.
- Database Management: MySQL, PostgreSQL, MongoDB, Oracle DB.
- DevOps Tools: Docker, Kubernetes, Jenkins, Terraform.

Key Projects

1. Smart Retail ERP

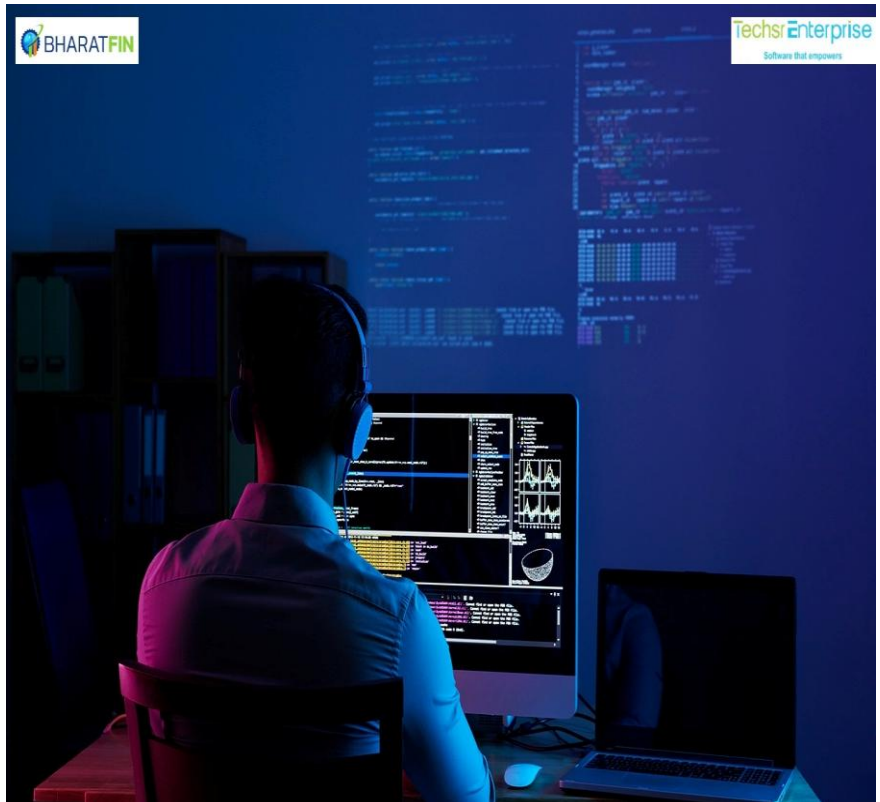

- Client: A leading retail chain.
- Solution: Developed a robust ERP system to streamline inventory management and sales tracking.
- Impact: Increased operational efficiency by 40%.

2. E-Learning Platform

- Client: EdTech startup.
- Solution: Built a user-friendly platform featuring real-time collaboration tools and AI-based learning paths.
- Impact: Attracted 50,000+ active users within the first 6 months.

3. Healthcare App

- Client: Multi-specialty hospital.
- Solution: Mobile app for appointment scheduling, & consultation, and medical record management.
- Impact: Improved patient engagement and reduced administrative overhead by 30%.

Why Choose Techsr Enterprise?

- Client-Centric Approach: We prioritize understanding your business needs to deliver customized solutions.
- Agile Development: Our iterative process ensures quick delivery and adaptability.
- Technical Expertise: A team of certified professionals with deep industry knowledge.
- End-to-End Support: From conceptualization to post-deployment maintenance, we've got you covered.

Features covered in the proposed CORE- ERP system

1. Centralized database ensures unified data storage and easy access across departments for better decision-making.

2. Streamlined operations automate repetitive tasks like inventory tracking, invoicing, and procurement to save time.

3. Customizable dashboards provide role-specific analytics and insights to improve productivity and clarity.

4. CRM integration ensures a seamless flow of customer data between sales, marketing, and service teams.

5. Human Resource Management System (HRMS) includes tools for employee data management, payroll, and performance tracking.

6. Real-time analytics enable businesses to track key metrics instantly, improving decision-making.

7. Machine ERP systems support manufacturing processes, including machine scheduling, maintenance, and quality control.

8. API integration connects multiple software platforms, ensuring seamless data exchange and enhanced functionality.

9. Inventory management modules help monitor stock levels, track

orders, and minimize wastage.

10. Financial management tools streamline accounting tasks such as budgeting, expense tracking, and financial reporting.

11. Customer segmentation capabilities in CRM allow for targeted marketing and personalized service.

12. Workflow automation reduces manual intervention in repetitive processes, improving efficiency and accuracy.

13. Multi-location management enables businesses to manage operations across multiple sites from a central system.

14. Vendor management features simplify supplier relationships, from onboarding to performance evaluation.

15. Sales forecasting tools in CRM provide insights into future sales trends based on historical data.

16. Employee self-service portals in HRMS allow staff to access payslips, request leaves, and update personal details.

17. Maintenance management in Machine ERP ensures timely servicing of machinery, reducing downtime.

18. Document management systems

help store, organize, and retrieve important business documents securely.

19. Role-based access controls enhance security by allowing users to access only the information relevant to their roles.

20. Data synchronization across platforms ensures consistency and eliminates redundant data entries.

21. Customer support tools in CRM help track and resolve service issues efficiently, enhancing customer satisfaction.

22. Multi-currency support in ERP systems simplifies international transactions and compliance with local regulations.

23. Recruitment modules in HRMS streamline the hiring process, from job postings to candidate onboarding.

24. Predictive maintenance in Machine ERP minimizes unexpected breakdowns by analyzing machine data.

25. Integration with e-commerce platforms allows ERP systems to sync orders, inventory, and customer data.

26. Time tracking tools in HRMS help monitor employee productivity and manage project timelines effectively.

27. Quality control features in Machine ERP ensure that production meets set standards and specifications.

28. CRM tools for lead tracking enable businesses to monitor potential customers through every stage of the sales funnel.

29. Real-time notifications in API integrations keep users informed of critical updates and events across systems.

30. Scalability in these systems ensures they can grow with the business, adapting to increasing demands and complexity.

Support/services provided

- Continuous Up gradation in the software for rich feature and future tuned.
- Both on site and off site, supports provided as per requirements.
- Extensive Training to Key staff.
- Mandatory feedback call process
